

FOX NEWS POLL

For release after 10:00AM/ET Monday, November 6, 2017.

VIRGINIA

The Fox News Poll is conducted under the joint direction of Anderson Robbins Research (D) and Shaw & Company Research (R). The poll was conducted by telephone with live interviewers November 2-5, 2017 among a random sample of 1,450 Virginia registered voters (RV).

Results based on the full sample have a margin of sampling error of plus or minus 2.5 percentage points.

A subsample of 1,239 has been defined as likely voters (LV), with a margin of error of plus or minus 2.5 percentage points.

Landline (910) and cellphone (540) telephone numbers were randomly selected from a statewide voter file of registered Virginia voters using a probability proportionate to size method. This simply means phone numbers are proportionally representative to the number of voters in all regions across the state of Virginia. Fieldwork conducted by Braun Research, Inc. of Princeton, NJ.

Results are of registered voters, unless otherwise noted.

An asterisk (*) is used for percentages of less than one-half percent.

A dash (-) represents a value of zero.

Some percentages may not add to 100% due to rounding. In the same way, percentages in “total” columns may be one point more or less than the sum of their component parts due to rounding.
